

# Esp32 energy Saving

---

IoT Low Power

# Table of contents

---

- 01 Power management**  
Pengenalalan
- 02 Deep sleep**  
Metode sleep ESP32
- 03 Hardware modification**  
Tuning untuk low Power
- 04 Battery system**  
System Baterai

# Goal

---

- Memahami low power management pada system IoT
- Mendesain dan implementasi low power IoT
- Membuat battery management dan deep sleep

# 01

## Power management

---

Pengenalan

# Metric design

## POWER MANAGEMENT

Supply Daya  
menggunakan baterai,  
energy harvesting.

## COMPLEXITY

Kemudahan desain  
dan development

## CONNECTIVITY

Banyak standar  
koneksi yang biasa  
digunakan tergantung  
dari kebutuhan

## SECURITY

Hardware security dan  
protokol yang  
aman/secure.

## RAPID EVOLUTION

Flexibilitas bisa  
digunakan di berbagai  
aplikasi

# PARAMETER CONNECTIVITY

Range  
Throughput  
Power source  
Topology

# Trick for esp32

---

## clock

Decrease clock rate

## Sleep mode

Sleep mode ketika tidak ada  
process data

## Hardware modification

Komponen low power  
Clock gatling  
Energy harvesting

# Software

- Reduce the CPU frequency to minimum.
- Shut down second CPU core.
- Minimum code execution, max sleep time

# Hardware

- Control Sensor (Clock gating), subsystem, ULP coprocessor
- Block power (LDO) – remove regulator (direct 3V)
- Energy harvester
- Brownout detection (Capacitor)
- Supercapacitor + battery

# Deep sleep esp32

---

ESP32 sleep method

# ESP32 Power Modes

- Active Mode
- Modem Sleep Mode
- Light Sleep Mode
- Deep Sleep Mode
- Hibernation Mode

### Active Mode

### Active:

- WiFi
- Bluetooth
- Radio
- ESP32 Core
- ULP Coprocessor
- Peripherals
- RTC

Power Consumption:

160~260mA

### Inactive:

### Modem Sleep

### Active:

- ESP32 Core
- ULP Coprocessor
- RTC

### Inactive:

- WiFi
- Bluetooth
- Radio
- Peripherals

Power Consumption:

3~20mA

### Hibernation

### Active:

- RTC

### Inactive:

- ESP32 Core
- ULP Coprocessor
- WiFi
- Bluetooth
- Radio
- Peripherals

Power Consumption:

2.5μA

### Deep Sleep

### Active:

- ULP Coprocessor
- RTC

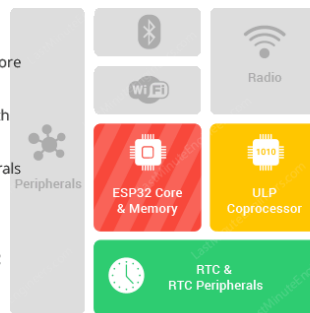

Power Consumption:

10μA

### Inactive:

- ESP32 Core
- WiFi
- Bluetooth
- Radio
- Peripherals

### Light Sleep

### Active:

- ULP Coprocessor
- RTC

Power Consumption:

0.8mA

### Inactive:

- WiFi
- Bluetooth
- Radio
- Peripherals

### Paused:

- ESP32 Core

# Wake Up Sources

## ESP32 DEVKIT V1 – DOIT

version with 36 GPIOs

Timer  
Touch pins  
External wake up  
ULP co-processor

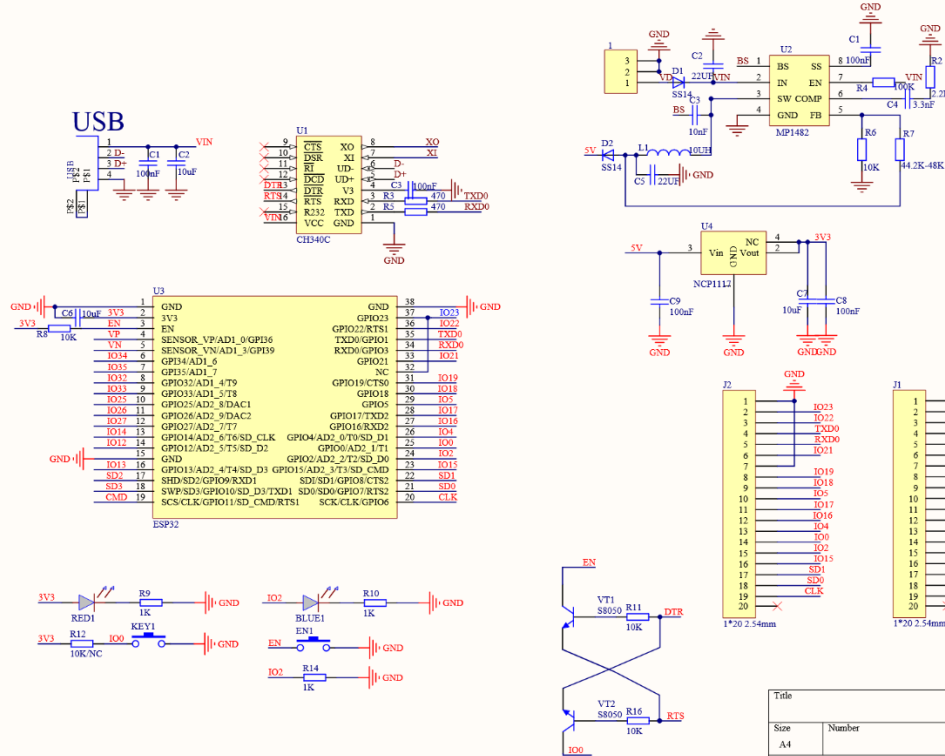

\* Pins SCK/CLK, SDO/SD0, SDI/SD1, SHD/SD2, SWP/SD3 and CSC/CMD, namely, GPIO6 to GPIO11 are connected to the integrated SPI flash integrated on ESP-WROOM-32 and are not recommended for other uses.

**Hardware modification**

# Hardware Modification

Title			
Size A4	Number		Revision
Date:	2017/8/18	Sheet of	
File:	D:\WORK\ \CH340 SchDoc	Drawn By	

# Design ESP low power

## Software

Scale the **single** core frequency down to 80 MHz

Switch off with DPORT register directly

Minimum flash memory usage

Skip flash checking for every wakeup

Turn off/sleep peripheral (OLED, flash, SRAM)

ULP programming

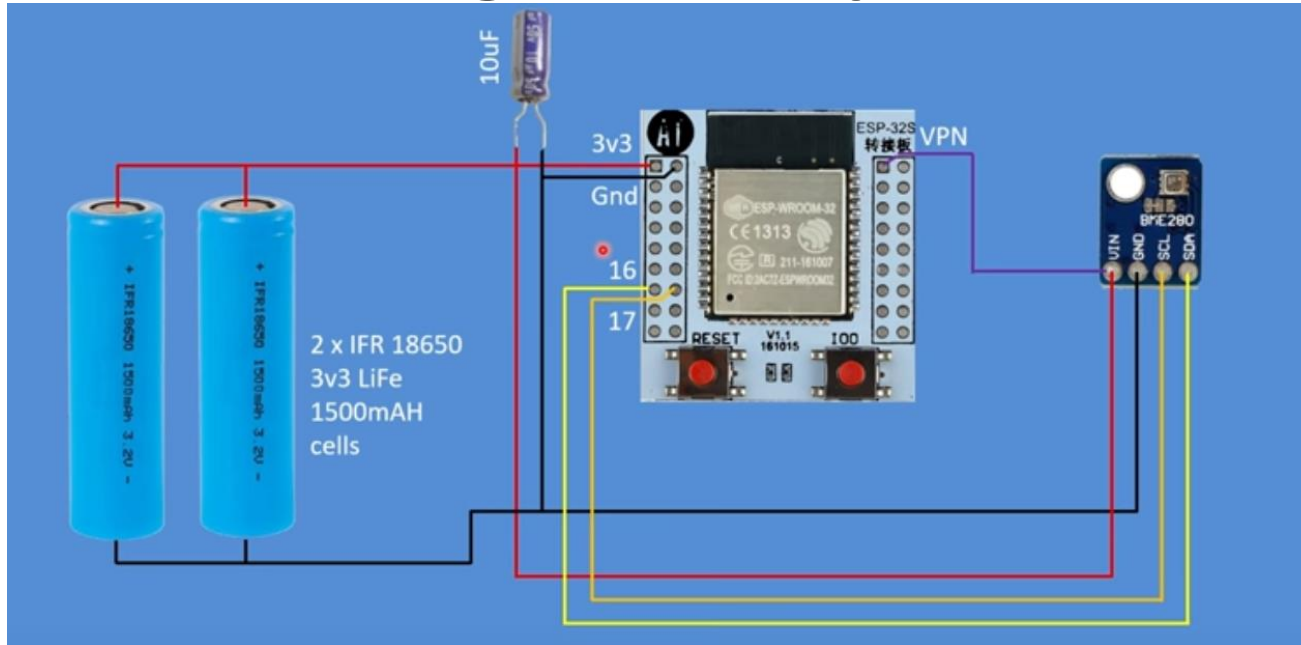

## Hardware

Redesign antenna (matching network)

Min hardware solution (no uart), no Regulator, no LED

# Design ESP low power

## Hardware

Redesign antenna (matching network)

Min hardware solution (no uart), no Regulator, no LED

# Wemos Lolin32 (Best Available board ESP32)

Condition	Wemos lolin32	General ESP32
DeepSleep 5v	0.235mA	11mA
DeepSleep 3.3v (unregulated)	0.235mA	11mA
Deepsleep 3.7V battery input terminal	128uA	

**Battery system**

# Diagram block

# Node Espnow Without sleep

## Your results:

Your device will probably run for **12 hours** or around **less than a day**

Its estimated, average power consumption per hour **130 mAh**

# Node espnow With sleep

Sleep time (second)	Power/hour (mAh)	Time run
No sleep	130	12 hours
10	14.76	4 days and 12 hours
60 (1 min)	12.89	5 days and 4 hours
300 (5 min)	12.58	5 days and 7 hours
3600 (1 hour)	12.51	5 days and 7 hours

# Code Diff using touch wake up

- RTC store data
- Init touchpin and threshold sensitivity (waker)
- Function to print cause of wake up
- Sleep command in main program

```
RTC_DATA_ATTR int bootCount = 0;
```

```
#define Threshold 40
```

```
touchAttachInterrupt(T3, callback, Threshold);
```

```
void print_wakeup_reason()
```

```
esp_sleep_enable_touchpad_wakeup()
```

GPIO 15 = TOUCH 3

# Alternative Resources

---

- Woman at desk working from home
- Mid shot woman at laptop
- Worried woman looking at phone
- Woman jumping and holding a camera
- African american man high view
- Girls dancing
- Front view guy with headphones holding a cup of coffee
- African american man reading his notes close-up
- Adorable model holding glasses

# Resources

---

- Man with black jacket talking on a phone and drinking
- Woman jumping and using her camera photo
- Alluring woman posing in yellow top
- African american man copy space
- Man posing with arms crossed
- Woman holding a camera photo
- Side view of male photographer
- African american man writing
- Man with black jacket talking on the phone
- African american man front view
- Young girl speaking on the phone in the office
- Young man wearing eyeglasses using laptop on kitchen counter
- Mid shot woman talking on phone at table

# Resources

---

- Front view of older woman working with pen
- Stylish model pointing at phone
- Studio shot of woman posing
- Guy sitting on a chair and holding a digital tablet
- Portrait freelance woman working from home
- Front view of businesswoman working with laptop and notebook

# Use our editable graphic resources...

You can easily **resize** these resources without losing quality. To **change the color**, just ungroup the resource and click on the object you want to change. Then, click on the paint bucket and select the color you want.

Group the resource again when you're done. You can also look for more **infographics** on [Slidesgo](#).

## ...and our sets of editable icons

You can **resize** these icons without losing quality.

You can **change the stroke and fill color**; just select the icon and click on the **paint bucket/pen**.

In Google Slides, you can also use **Flaticon's extension**, allowing you to customize and add even more icons.
